

HASIRA NENUKA

Software Developer | Full-Stack Web Applications | Security Mindset

Maharagama, Sri Lanka | hasiranenuka20896@gmail.com | github.com/hasira-nenuka

PROFILE SNAPSHOT

Available For

Internships, freelance work, collaborations and practical software engineering opportunities.

Core Focus

- Full-stack web apps
- Secure software habits
- Automation testing
- Academic systems
- Clean UI delivery

Technology Stack

React	TypeScript
Node.js	MongoDB
Java	Spring Boot
SQL	Linux

PROFESSIONAL SUMMARY

Information Technology undergraduate and aspiring full-stack developer building practical, user-friendly and maintainable web applications. I focus on real product workflows, clean interface design, reliable backend services and secure development habits across authentication, validation and application structure.

SIGNATURE STRENGTHS

- Designing responsive, polished interfaces that make complex workflows easier to understand.
- Building REST APIs, role-based access, dashboards and database-backed application features.
- Applying a security-aware mindset through input validation, authentication, authorization and OWASP fundamentals.
- Turning academic requirements into complete project systems with practical user journeys.

FEATURED PROJECTS

University Internship & Career Management System

Internships, applications, approvals, communication and analytics.

Helpdesk Management System

Support dashboards, ticket assignment, PDF exports and REST API endpoints.

Facilities Halls Booking System

Hall bookings, maintenance requests, approvals and role-based access.

Automated Language Conversion Tests

Playwright automation for Singlish and Thanglish conversion workflows.

EDUCATION

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology (SLIIT). Expected graduation: 2027. Relevant modules include Database Systems, Software Engineering, Web Application Development, Data Structures and Algorithms, Computer Networks and Information Security.

CYBER SECURITY DIRECTION

Growing interests include network security, ethical hacking fundamentals, secure software development, Linux administration and web application security, with emphasis on OWASP Top 10, secure coding standards and security code review.
